compulsory land acquisition and involuntary displacement of communities for a larger public purpose captures the tension of development in the modern state with the need to balance the interests of the majority while protecting the rights of the minority in India. Informal estimates of involuntary resettlement are estimated to be around 50 million people over the last five decades and three-fourths of those displaced still face an uncertain future. Growing public concern over the long-term consequences of this has led to greater scrutiny of the rehabilitation and resettlement process, particularly for large development projects. This book examines a number of new policy formulations put in place at both the central and state levels looking at land acquisition procedures and norms for rehabilitation and resettlement of communities. The book combines a theoretical analysis of the proposed regulatory framework with detailed case studies that examine the application of these norms in specific geographic contexts across the country. It brings together contributory analysis by some of the country's most engaged administrators, academics, and activists in the field and is a useful contribution to development studies.

This book considers mass media and contemporary cultural trends to examine masculinity at a point of unprecedented change while sexual and gender politics have always been fraught. The long unexamined privilege associated with masculinity is now subject to intense scrutiny marked by a host of complex factors as past markers of masculine norms have been challenged on cultural, social, and economic fronts. Men occupy public space ever aware that how they interact with others is questioned and questionable. What does manhood mean? Who is included in its dominant formations? What performances signify membership in the club? How are men reading this contemporary moment and to what extent does cultural literacy inform, maintain, or challenge normative male identities and subsequent performances? This work examines such questions through language and symbolic meaning and challenges its readers to critically examine what men know and how they understand and embody gender and sexuality in a post-millennial society. Gender, sexuality, and the cultural politics of men's identity in the new millennium. Literacies of masculinity crosses academic disciplines and will be highly relevant in composition, rhetoric, gender studies, masculinity studies, and cross-curricular courses that take up popular contemporary culture as well as gender, sexuality, race, and class. It has been designed with both undergraduate and graduate students in mind.
